Kagura:
Dances of prayers dedicated to the divine

Program

Kami-oroshi (beckoning the gods) :

A ceremonial dance traditionally performed at the outset of *kagura* to welcome the divine

Katsuragi-san (Mt. Katsuragi) :

A dance depicting the battle between the Tsuchigumo (earth spider) and Minamoto-no-Raiko's brave warriors

Yamata-no-Orochi :

A dance portraying the renowned Japanese myth of Susano-o vanquishing a colossal eight-headed serpent

Located in the heart of Hiroshima Prefecture in western Japan, Akitakata City is renowned for its rich cultural heritage of *kagura*, traditional Shinto music and dance performances. The term *kagura* is written in Japanese using the characters for "gods" and "enjoyment." This art form has been cherished throughout Japan as both a folk performing art and a Shinto ritual passed down since ancient times. *Kagura* in Akitakata City, which originated over 300 years ago, has also achieved its own evolution over time. Its diverse performances with rich, enthralling theatrics have captured the hearts of audiences of all ages. This event will showcase a multitude of fantastical spirits, brought to life by the renowned Hasadake Kagura Troupe, known for its outstanding entertainment. Delight in the dynamic dances featuring the Earth Spider and a colossal serpent—an experience not to be missed. Moreover, events are planned in the hitaru foyer on the day of the performance, including the exhibition of *kagura* attire and props, and a photo opportunity to wear *kagura* attire. *Kagura* merchandise and products from Hiroshima Prefecture will also be sold. Relish a moment of immersion into the profound and authentic traditions of Japan at hitaru.
